01 · THE ENGINE — GAZE

Look at it. Say “this.” The agent knows.

A resident AI agent that sees where you look, hears what you say, and operates **any app on macOS**.

02 · THE PRODUCT — KIO

Same engine, at the kiosk.

For customers new to digital, Kio works like a counter clerk: **look and speak**, and Kio understands and taps for you. Payment is the one tap left to the customer.

GAZE ENGINE		IN KIO
Liquid Glass gaze	→	**Enlarges what you look at, in plain words**
Deictic binding	→	**“This one,” “that one too”**
Hesitation cues	→	**Speaks up first when you're lost**
Safety gate	→	**Money moves only on your tap**
Any-app control (AX)	→	**Retrofits onto existing kiosks**

Customer “응, 이거 하나 따뜻한 걸로”
“Yeah, this one. Make it hot.”

WHY KIOSKS

20.3%p
Gap in kiosk use between seniors and the general public

55.5%
Seoul kiosk users 55+ who say they are “not skilled” at it

0.7%
Share of barrier-free kiosks (3,482 of ~530k in Korea)

WHY NOW — From **Jan 28, 2026**, accessibility duties cover every existing kiosk in Korea

NEXT — Wizard-of-Oz test at a senior center → café pilot
